What is your favourite fruit?

Mangoes

Mangoes are one of the most popular fruits in the world. They are full of flavour and are sometimes called a "super fruit".

Mangoes are delicious and most people enjoy them. They came from India, but now we find them growing around the world in many continents.

Each fruit measures 5 to 15 cms in length and about 4 to 10 cms in width, and has an oval shape. It weighs from 150 gms to around 750 gms. The skin is smooth and is green before it is ready to eat. Mangoes then turn golden yellow, red or orange-red when they are ripe. The fresh mango season lasts from April until August.

Health benefits of Mangoes

- Mangoes can improve eye health.
- Mangoes can protect against some cancers.
- Fresh mango can help to control blood pressure.

Preparation and serving method

Wash mangoes in cold running water to remove dust and dirt. Dry using a soft cloth. Cut the fruit lengthwise into three pieces or cut on each side of the hard centre.

Enjoy your favourite mangoes in salads, chutneys, desserts and sauces.
