E3 Reading – Hackney Places – Teacher Script (what to do and say, slide by slide)

Keep this on the desk. On the projector page, press T (or the “Teacher script” button) to show the same notes on screen – but remember the class can see them too. Answers are in the day plan.

Morning – AM projector lesson (Hackney Places)

Slide	Do	Say
1	Do the register. Texts A–D and the question sheets ready on your desk.	“Good morning! Today we’re reading about four places in Hackney. You will become an expert on one place – and then teach your group about it.”
2	Click 📋 Copy text for NaturalReader (nothing shows on screen), paste into NaturalReader and play it TWICE – or read it aloud yourself. Then click Start the game. Stuck halfway? Play it once more.	“Listen carefully – I’ll read a paragraph twice. Then guess the words! … … Well done. Which words describe the park? (large, green, quiet, busy) Which words tell us HOW people do things? (slowly, happily) – Write both lists on the board and keep them for this afternoon.”
3	Pairs, 2 minutes. Then take ideas and write them on the board.	“Look at these four places. Talk to your partner: have you been there? What can you do or buy there? … Who has been to Ridley Road? What did you buy?”
4	Learners come to the board one at a time. Then drill and pair test.	“These words describe places. Come and match the word and the meaning. … Repeat after me: COLourful. exPENsive. FAmous. … Now pairs: A says the meaning, B says the word.”
5	Pairs guess. Do NOT click yet – you come back here after slide 8.	“Don’t read anything yet! Guess with your partner: which place is busy and noisy? Which is calm and quiet? … We’ll check after the reading.”
6	Give each table its own text (A, B, C or D) and everyone a question sheet. Click Start 15 min. Walk round and check every group’s answers and underlining (day plan, Answers) – experts must be right before they move. Fast finishers: read the other places’ questions so they know what to ask.	“Your table has one place. Read it alone first – no talking. Answer only the questions for your place: A is 1 to 5, B is 6 to 10, C is 11 to 15, D is 16 to 20. Underline the words that prove each answer and write the question number next to them. Then check with your group. You are the experts – you will teach the others!”
7	Make new groups: one A, one B, one C, one D at each table (one group has two As). Click Start 20 min – about 4–5 minutes per expert. Listen for experts who only say the letter: make them read the proof.	“Now change tables. Each new group needs an A, a B, a C and a D. Take your text and your question sheet – but don’t show your text. Experts: give your answers and prove them – read the words you underlined. Everyone else: write the answer and the paragraph number. If they don’t say the paragraph, ask: ‘Which paragraph?’”
8	Go 1 to 20. Ask a learner who was NOT the expert for that place for the answer, then ask an expert for the proof (read the underlined words). Then click the box. If many got it wrong, ask the expert to read the line again. After 20, press ← three times to slide 5 and check the predictions.	“Let’s check all twenty. Question 1 – not the Ridley Road experts – what’s the answer? … Ridley Road expert: prove it! Which paragraph? Read it to us.”
9	Phones out: learners scan the Vote card QR (top right). Everyone holds up their answer before you click. Ask for the clue every time.	“In the exam there is always a question: what does this word mean? Scan the code and open the vote card. Read the sentence. Ready? Hold up your answer – A, B, C or D! … What is the clue in the sentence? … Try the answer in place of the word. Does it make sense?”
10	Same as the last slide.	“Remember: no dictionary in the exam. Read the sentence before and after the word – the text gives you the clue. Vote cards up: A, B, C or D?”
11	Click Open the Kahoot, then Start (Classic). After it, go over the two most-missed questions.	“Phones out! Go to kahoot.it and type the PIN on the screen. Twenty questions – about the places, the words and adjectives.”
12	Pairs, 3 minutes. Two or three learners share with the class.	“Tell your partner about a place near where you live. Where is it? What can you do there? Use two adjectives. … Thank you! After the break we go to the PC room.”

Afternoon, PC room – PM projector lesson (Describing Hackney)

Slide	Do	Say
1	PCs logged in. Find the error link posted in Teams General.	"This afternoon: adjectives and adverbs. Then you will check your place on the map and write about your favourite place in London."
2	Point to the two boxes, then the words at the bottom.	"This morning we read: 'Traders shout loudly.' Shout – HOW? Loudly. That's an adverb. 'A busy market' – busy describes the market. That's an adjective. … Careful: good becomes WELL. Fast stays fast. Hard stays hard. … A quiet street or a quietly street? Speak quiet or speak quietly?"
3	Learners come to the board one at a time and click.	"Come to the board. Choose the right word. Class – is it describing a thing, or HOW someone does it? … Careful with the last one: hardly does NOT mean hard!"
4	Learners on PCs, on their own. Walk round and note the common mistakes.	"Now on your PC. Open Teams, General, and click the Find the error link. Tap the word that is wrong, then type the correct sentence. Twenty sentences. Finished? Help your neighbour."
5	Learners on PCs. After 15 minutes, quick class share.	"Open Google Maps. Search for your place from this morning. Find the nearest station, the opening times, and how long it takes to walk there from college. Read the reviews – find two adjectives. … Ridley Road group – what is the nearest station?"
6	Read the example aloud. Point out the highlighted adjectives and the underlined adverb.	"Now write about YOUR favourite place in London. Four or five sentences. Three adjectives and one adverb – like my example. Post it in Teams, General. Start with the name of the place."
7	When most have replied, put two posts on the screen: praise good adjectives and correct one mistake together.	"Read two of your classmates' posts. Reply to each one with ONE question. Then answer the questions people ask you."
8	Everyone away from the PCs, facing the screen. Learners open the Vote card on their phones (QR top right). Click the button – the questions are already loaded. You run it.	"Let's play Who Wants to Be a Millionaire! I read the question. Everyone holds up your vote card – A, B, C or D. … Most people say B – final answer? OK!"
9	Pairs, 3 minutes.	"Before you go: make one sentence with quiet and one with quietly. One with good and one with well. … Thank you, everyone. See you on Wednesday!"
